HOUSE KEEPING

To many people good housekeeping in a place just means sweeping and cleaning up. But good housekeeping is a lot more than that. It is the foundation of an effective health accident prevention program. A neat, clean, and orderly place is a hygienic and safer place.

Effective housekeeping can eliminate some workplace hazards and help get a job done safely and properly. Poor housekeeping can frequently contribute to accidents by hiding hazards that cause injuries. Housekeeping is not just cleanliness, it includes keeping work areas neat and orderly, maintaining halls and floors free of slip and trip hazards and removing of waste materials and other fire hazards from work areas. Good housekeeping is also a basic part of accident and fire prevention.

We believe that effective housekeeping is an ongoing operation. It is not a hit-and-miss cleanup done occasionally. Periodic "panic" cleanups are costly and ineffective in reducing accidents. Our staff carries out housekeeping not only to make the premises look clean but also to make it more hygienic and safer to use and live in comfortably.
